ACROSS

- 1 A chemical agent that produces local irritation and damage to the skin and mucous membranes.
- 6 Federal _____ Managment Agency (FEMA).
- 8 Minimum temperature at which a liquid gives off sufficient enough vapor to ignite and flashover.
- 11 The METTAG color for less serious and delayed transport.
- 17 A condition when insufficient oxygen is available to meet the oxygen demands of the cells.
- 18 The METTAG color for persons with minor injuries
- 20 Effects seen in the offspring of the individual who received the toxic agent.
- 23 In or toward the direction from which the wind blows.
- 24 The time required for the level of a substance in the blood to be reduced by 50 percent of its initial level.
- 27 The decontamination of large

- 2 Exposure to a substance through numbers of patients.
- 30 Compounds that are unstable and break down with the sudden release of large amounts of energy.
- 31 Emergency Medical Service
- 32 The time from exposure to the disease until the first appearance of symptoms
- 33 A substance that strongly burns, corrodes, irritates or destroys living tissue.
- 35 The METTAG color for for someone who is critical and first to be transported
- 36 The deliberate use of biological agents to kill or harm humans
- 37 A poison that can be made from the waste left over from processing castor beans
- 38 ALS Allowable procedures and techniques used by paramedics and EMTs to stabilize patients.

DOWN

- 3 WMD
- 4 Any substance which, taken into the body by any method will interfere with normal physiological functions.
- 5 Absence of oxygen
- 7 Chemical agent that acts by disrupting the normal function of the nervous system.
- 9 An individual trained in advanced life support according to the standards set by the state or county.
- 10 Permissible exposure limits; the maximum average concentration to which 95% of otherwise healthy adults can be repeatedly and safely exposed for an 8 hour period and 40 hour week.
- 12 A chemical agent that is inhaled and absorbed into the blood acting upon hemoglobin in the blood cells.
- 13 The METTAG color for a deceased or unsalvageable person
- 14 The location where incident personnel and equipment are assigned on an immediately available status.
- 15 Federal Bureau of Investigation
- 16 Emergency Operations Center
- 19 Emergency Operations Plan
- 21 An acronym for Chemical, Biological and Radiological.
- 22 The four color system of tagging patients during the triage process.
- 25 Fine liquid or solid particles suspended in air.
- 26 The acronym for Biological, Nuclear, Incendiary, Chemical or Explosives.
- 28 A military acronym for nuclear, biological and chemical weapons.
- 29 The outer layer of skin
- 34 Originally known as the incident command system; it is now a "management" system.
